

DUCKIES Canary Network

Executive Summary

Duckies is Yellow's canary network that tests the innovations of Yellow Network in a real-world environment, but with smaller transaction value.

\$DUCKIES are the utility token of canary network and can be obtained by completing quests, inviting friends to grow the community, and playing an exciting Trading Card Game (TCG) to get a super-powered, mythic Duckling that unlocks exclusive benefits for holders, ultimately yielding \$YELLOW tokens.

Explore Duckies community calls, Ambassador Program, and start minting and combining Ducklings.

Duckies Canary Network

Duckies is built with the same team, code, and tools as Yellow Network, integrates all of the functionality of Yellow Network, and acts as a sandbox for Yellow to experiment with innovations and new functions.

Minting Ducklings

Use \$DUCKIES to get a totally unique (completely random!) booster pack of Ducklings, unique NFTs. Every Duckling has its own set of unique traits, eyes, wings, beaks, hairstyles, clothes that defines how rare it is and what qualities it has.

Booster Packs

Every minting action will get you a chosen number of randomly assorted cards, from 1 to 100. You can also get booster packs as a reward for winning social calls or performing quests.

Rarity

There are four basic levels of Ducklings rarity:

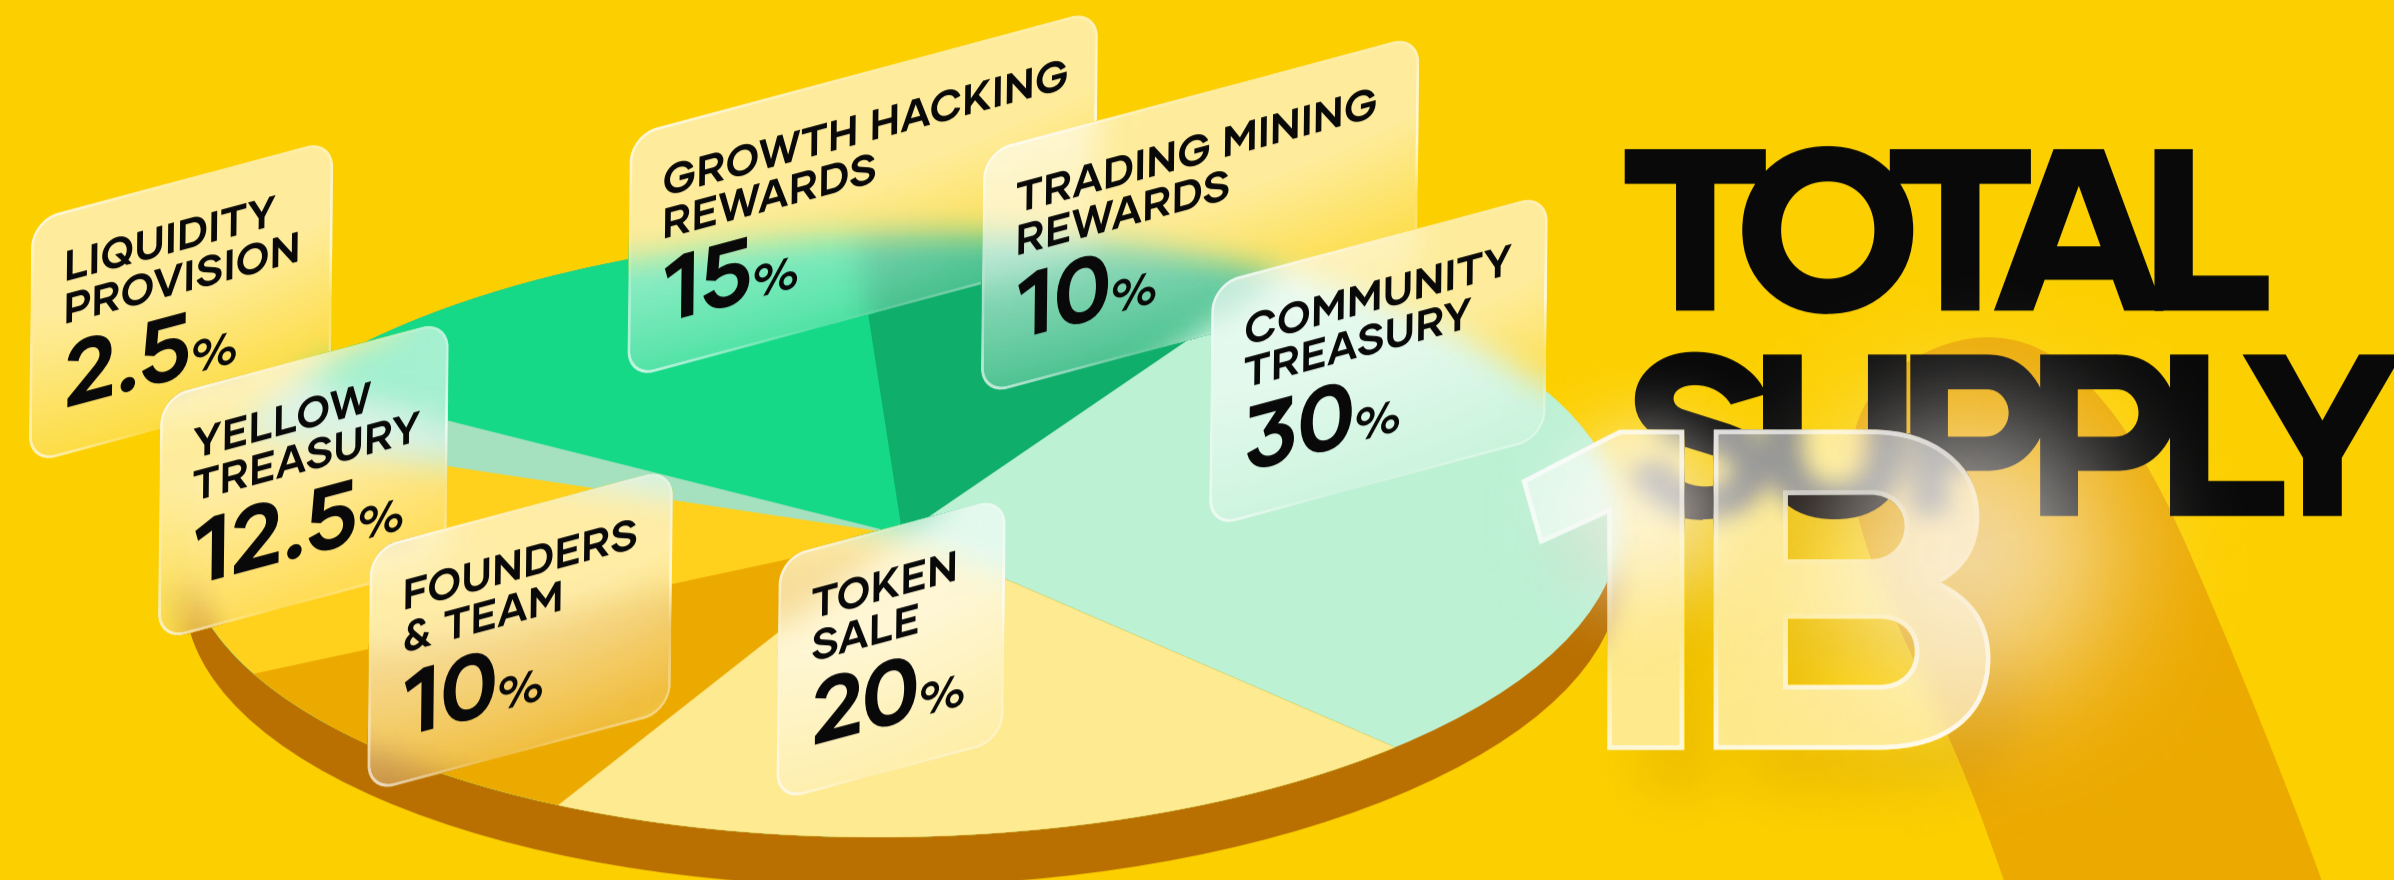

Level 1	Level 2	Level 3	Level 4
Common	Rare	Epic	Legendary

There are two additional types that can be acquired ONLY through melding:

- **Mythic**, provides future \$YELLOW incentives
- **Zombeaks**, your Duckling can mutate into a Zombie Duck

Duckonomics

The duckonomics models is to issue \$DUCKIES for user acquisition and collect back those \$DUCKIES in the TreasureVault while creating more and more valuable NFT collections.

Tokens that are used for minting/melding card decks are returned to the project pool and are used for payouts and rewards.

Quests for DUCKIES

Quests are the bread and butter for getting more \$DUCKIES to be used to mint your very own Ducklings NFT collection. If you invite your friends, you can also claim bonuses for all quests they complete.

Quests

1	Verify your account	D 7
2	Mint your first NFT	D 3
3	Invite 5 friends	D 5
4	Follow us on Twitter	D 3
5	List your NFT on OpenSea	D 7

Melding Ducklings

Get your tin foil hats on and start the crazy science of mixing the Ducklings' DNA to produce a new one of a higher rarity. Select 5 cards of the same family or the same color to initiate the meld.

The higher the rarity class, the more valuable your Duckling is and the more benefits it will bring to you.

But be careful! If something goes wrong, you might get a zombeak-mutant.
